MAXIMUS® GPS

YOUR NAVIGATION IN THE WORLD OF TENNIS

MAXIMUS TENNIS · CATALOGUE 2026

Your configuration. Your style. Your game.

Racquets and training tools joined in one system of selection, personalisation and tennis development.

MAXIMUS RACQUET IS YOUR KEY TO THE MAXIMUS WORLD.

ONE KEY · ONE ECOSYSTEM · UNLIMITED OPPORTUNITIES

Cover: MAXIMUS GREAT 97 · 363 g
Edition 5.0 · 14 October 2026 · product data 2026-10-13.D

INSIDE

Find your way through the system.

01 **The idea** 3
MAXIMUS TENNIS in the MAXIMUS Ecosystem, a permanent base and how to choose.

02 **Racquets** 6
GREAT, POWER and SPIN, seven lengths, eight factory grips and the precision classes.

03 **The matrix** 13
1,547 variants and 12,376 combinations with grips — what they mean.

04 **Training** 14
Sweet Spot Trainer, Spot Trainer and kits built around your racquet.

05 **Partners** 17
Personal identity, clubs and national programmes, MAXIMUS Pro Shop, cooperation and meetings.

06 **Reference** 21
The ecosystem with its actual statuses, technical tables, contacts and version.

HOW TO READ THIS CATALOGUE

Data	Every figure comes from product data 2026-10-13.D, the same data as maximus.tennis.
Statuses	● CURRENT ● AVAILABLE BY AGREEMENT ● IN DEVELOPMENT
Pictures	Product pictures are the approved MAXIMUS compositions; concepts are labelled as such.

CONFIGURE A REQUEST
The configurator saves your choice and returns a request ID.

WEBSITE
The same data in 48 languages: maximus.tennis

MAXIMUS TENNIS

The tennis direction of the MAXIMUS Ecosystem.

From an individual racquet and training kit to partner clubs, concept stores and national programmes. First the product, its specification and the way you choose it — then the scale of the partnership.

RACQUETS

GREAT, POWER and SPIN — 99 listed weights, each in seven lengths and eight factory grips.

TRAINING

Sweet Spot Trainer and Spot Trainer — 61 weights each, in the same seven lengths.

IDENTITY

From a silver-engraved name to a personal, club or corporate collection on the MAXIMUS base.

PARTNERS

Coaches, clubs, shops, distributors, national and infrastructure partners — each on written terms.

3	7	8	1,547
playing series	standard lengths	factory grips	variants

MAXIMUS RACQUET IS YOUR KEY TO THE MAXIMUS WORLD.

ONE KEY · ONE ECOSYSTEM · UNLIMITED OPPORTUNITIES

Actual status, always. What works today, what is available by agreement and what is in development are marked as such — in this catalogue and on maximus.tennis. Planned clubs, programmes and infrastructure are never presented as operating.

A PERMANENT BASE

A permanent base. Individual development.

We build the range around configurations a player can choose deliberately and keep using. The matte-black base keeps the character of MAXIMUS; personal elements make the racquet yours.

Shown: MAXIMUS POWER 98 · 290 g with its personal engraving zone.

01 Matte-black base

The permanent character of every MAXIMUS racquet.

02 Individual design on top

Names, initials, numbers, club and corporate designs are added to the base.

03 New possibilities extend it

New lengths, weights and training tools add choice; they do not replace what exists.

04 Chosen by the player

Selection starts from the player and the purpose of the equipment.

05 Belonging

Personalisation connects a racquet to a player, a club or a community.

06 Long-term partnership

Lasting value with partners rather than seasonal sales cycles.

HOW TO CHOOSE

Choose in six steps.

Every step uses the same data as maximus.tennis, so the racquet you choose here is the one you can request there.

01 Series

GREAT, POWER or SPIN by playing direction: control, power or spin.

02 Weight

One of the 33 listed weights of the series.

03 Length

One of seven standard lengths, 26.3–27.9 in. Any other length is an engineering request.

04 Grip

One of eight factory grips, L0–L7, including the larger L6 and L7.

05 Training tools

Spot Trainer and Sweet Spot Trainer at the same length as the racquet.

06 Request

The configurator saves the selection and returns a request ID. The reply comes in writing.

WHAT A REQUEST IS

A saved configuration with a request ID. It is not an order, a price, a stock confirmation or a delivery date; those are confirmed in writing.

MAXIMUS GPS · GREAT POWER & SPIN · YOUR NAVIGATION IN THE WORLD OF TENNIS

Three series. One construction standard.

Fully carbon from frame to handle. The same precision classes, the same seven lengths and the same eight factory grips for every series.

GREAT

97 in² · Control

Built around control: a compact head, precise contact and directional confidence.

33 weights
236–369 g

Balance at 27 in: 321–343 mm, calculated

PAGE 7

POWER

98 in² · Power

Built around energy transfer: depth and pace from a stable frame.

33 weights
210–377 g

Balance at 27 in: 320–347 mm, calculated

PAGE 8

SPIN

100 in² · Spin

Built around ball behaviour: rotation, margin and trajectory shaping.

33 weights
222–377 g

Balance at 27 in: 315–339 mm, confirmed

PAGE 9

SHARED	STANDARD
Construction	Fully carbon, frame to handle; grip geometry is part of the carbon structure
Precision	P2.5 · P1.5 · P0.5 — page 12
Lengths	26.3–27.9 in, seven standard lengths — page 10
Grips	L0–L7, eight factory sizes — page 11

CHOOSING A SERIES

Choose the series by playing direction, then complete the configuration: precision class, weight, length, grip and personalisation.

MAXIMUS GREAT · 97 IN²

GREAT. Control.

The 97 in² GREAT architecture is built around control: a compact head, precise contact and directional confidence.

Shown: MAXIMUS GREAT 97 · 299 g.

33 LISTED WEIGHTS, G

236	239	242	245	248	251	254	257	260	263	266
269	272	277	280	284	288	292	295	299	303	306
309	313	319	323	329	333	339	344	355	363	369

Balance at 27 in	321–343 mm — calculated values, not individual measurements
Lengths	26.3 · 26.6 · 26.8 · 27 · 27.3 · 27.6 · 27.9 in
Grips	L0–L7
Variants	33 weights × 7 lengths = 231

A newly selected length inherits no balance: the balances on record refer to 27 in.

MAXIMUS POWER · 98 IN²

POWER. Depth and pace.

The 98 in² POWER architecture is built around energy transfer: depth and pace from a stable frame.

Shown: MAXIMUS POWER 98 · 320 g.

33 LISTED WEIGHTS, G

210	215	220	225	230	235	240	245	250	260	265
270	275	280	285	290	295	300	305	310	315	320
325	330	335	340	345	350	355	360	365	370	377

Balance at 27 in	320–347 mm — calculated values, not individual measurements
Lengths	26.3 · 26.6 · 26.8 · 27 · 27.3 · 27.6 · 27.9 in
Grips	L0–L7
Variants	33 weights × 7 lengths = 231

A newly selected length inherits no balance: the balances on record refer to 27 in.

MAXIMUS SPIN · 100 IN²

SPIN. Rotation and margin.

The 100 in² SPIN architecture is built around ball behaviour: rotation, margin and trajectory shaping.

Shown: MAXIMUS SPIN 100 · 290 g.

33 LISTED WEIGHTS, G

222	229	233	236	239	243	247	250	253	257	260
263	267	270	273	277	280	283	287	290	294	297
315	320	325	330	333	339	347	355	360	366	377

Balance at 27 in	315–339 mm — confirmed values
Lengths	26.3 · 26.6 · 26.8 · 27 · 27.3 · 27.6 · 27.9 in
Grips	L0–L7
Variants	33 weights × 7 lengths = 231

A newly selected length inherits no balance: the balances on record refer to 27 in.

SEVEN LENGTHS

Seven lengths. One scale.

Every listed playing weight and both trainers come in the same seven standard request lengths, so a racquet and its training tools can be matched.

STANDARD REQUEST LENGTHS — INCHES AND MILLIMETRES

26.3	26.6	26.8	27	27.3	27.6	27.9
668.02	675.64	680.72	685.80	693.42	701.04	708.66
SHORT			STANDARD	PLUS		SUPERLONG

DRAWN TO ONE SCALE

AT EVERY LENGTH

221 variants

99 playing and 122 trainer variants; with the eight factory grips, 1,768 combinations.

OUTSIDE THE SEVEN

A length outside the seven standard lengths is an individual request with an engineering review. Competition eligibility is checked separately.

Balances on record refer to 27 in. A newly selected length — including an explicit 27 in request — inherits no balance, swingweight, stiffness, price, stock or lead time.

GRIP ARCHITECTURE

Eight factory grips. L0–L7.

Grip geometry is part of the carbon handle architecture. Each size is manufactured as handle geometry, not built up with overgrips.

L0	L1	L2	L3	L4	L5	L6	L7
4 in	4⅛ in	4¼ in	4⅜ in	4½ in	4⅝ in	4¾ in	4⅞ in
101.6 mm	104.8 mm	107.9 mm	111.1 mm	114.3 mm	117.5 mm	120.6 mm	123.8 mm

Nominal designations; millimetres converted from the nominal inch size. Raw handle dimensions and the measurement protocol are separate.

The lion on the butt cap.

Every hand is part of the selection.

The eight sizes include the uncommon larger L6 and L7, so a less common hand size is part of the selection rather than an exception.

APPLIES TO

GREAT · POWER · SPIN · Sweet Spot Trainer · Spot Trainer

A rare configuration is still a configuration: every weight, length and grip combination in the matrix can be found and requested, including the ones few players need.

PRECISION SYSTEM

Weight. Balance. Swingweight. Stiffness.

Four parameters controlled as one engineering system. Each class defines how tightly a finished racquet is held to its declared specification and which quality records are produced.

CLASS	WEIGHT	BALANCE	SWINGWEIGHT KG·CM²	STIFFNESS
P2.5 Scalable performance core	±2.5 g	±2.5 mm	±2.5	±1 RA
P1.5 Advanced precision	±1.5 g	±1.5 mm	±1.5	±0.5 RA
P0.5 Professional · individually controlled	±0.5 g	±0.5 mm	±0.5	declared RA

P0.5 conforms to the declared RA under the established factory measurement protocol.

P2.5. Individual measurement and retained production records.

P1.5. Individual measurement, individual records and traceability.

P0.5. Nominal and actual values with individual measurement records; serial identity, batch traceability, a precision certificate and matched sets where the programme for the order implements them.

MATCHED SETS

Matched-set criteria are defined separately from individual tolerance. Matched pairs, triples and team sets are requested through the configurator and confirmed in writing.

EXCLUSIVE OPTION

ZERO — *Zero Gram Tolerance*

The three classes hold a finished racquet inside a declared band. ZERO removes the band: the racquet is built and measured until the reading equals the declared figure at the resolution of the factory instrument, and that reading is issued with it. Agreed individually for one racquet or one matched set; not a fourth class. An identical displayed figure is not a claim of zero physical variation.

THE MATRIX

1,547 variants. 12,376 combinations.

693 playing variants and 854 trainer variants. With the eight factory grips every variant becomes eight combinations.

FAMILY	WEIGHTS × LENGTHS	× 8 GRIPS
GREAT	33 × 7 = 231	1,848
POWER	33 × 7 = 231	1,848
SPIN	33 × 7 = 231	1,848
Sweet Spot Trainer	61 × 7 = 427	3,416
Spot Trainer	61 × 7 = 427	3,416
Total	**1,547**	**12,376**

VARIANT	Family × weight × length. The unit of the request catalogue.
COMBINATION	Variant × factory grip, L0–L7.
UNIT	One physical racquet or trainer.
NOT IN THE COUNT	Precision classes, quantities and custom lengths are separate fields and never multiply it.

ONE COMBINATION, READ LEFT TO RIGHT

Family	Weight	Length	Grip
SPIN	290 g	27 in	L2

One of 12,376 combinations; its balance on record at 27 in is 335 mm.

A request catalogue. The matrix lists what can be requested. It is not stock, a price list, a lead time or production approval of every combination; those are confirmed in writing for each request.

TRAINING · SWEET SPOT TRAINER

Make contact the focus of practice.

Shown: Sweet Spot Trainer 300 g. The frame is marked SWEET AREA RACKET 50.

61 weights from 200 to 500 g in 5 g steps, each in seven lengths: 427 variants.

HISTORICAL BASELINE AT 27 IN — WEIGHT AND BALANCE AS SUPPLIED

270 g	285 g	300 g	400 g
330 mm	325 mm	325 mm	320 mm

Head · pattern	50 in² · 12 × 14
Purpose	Centred contact, sweet-spot awareness, racquet control, progressive loading, coach-led development, transition back to the performance racquet
Load	Heavier configurations are controlled training loads; the coach defines load, duration and progression

TRAINING · SPOT TRAINER

Find the exact point. Repeat it.

Shown: MAXIMUS Spot Trainer with its small round contact target.

Training the player to find and repeat a precise contact point.

Weights	200–500 g in 5 g steps — 61 weights
Lengths	26.3 · 26.6 · 26.8 · 27 · 27.3 · 27.6 · 27.9 in — 427 variants
Grips	Factory L0–L7
Use	Coach-led contact-point practice; then Sweet Spot Trainer; then transfer to the playing racquet

Precision classes are not applied automatically to training tools. Spot Trainer is not a miniature conventional racquet.

KITS

Build a system around your racquet.

Matching lengths of playing and training tools support consistent practice. The composition and weights of a kit are chosen for your goals.

1	2	3	4	5	6
Playing racquet	Length and grip	Spot Trainer	Sweet Spot Trainer	Kit	Request

01 Playing kit

Several playing racquets at the player's length and grip, for matches and training.

02 Individual training system

Playing racquets with Spot Trainers and Sweet Spot Trainers at the same length.

03 Coach kit

Training tools across the weights the coach works with, for demonstration and practice.

04 Club kit

A club library of configurations for fitting days, matched sets and team programmes.

05 National demonstration library

The full reference collection for a country — page 18.

AN EXAMPLE, NOT A RULE

6 + 5 + 5 = 16

Six playing racquets, four or five Spot Trainers and four or five Sweet Spot Trainers: 14 to 16 items at one chosen length. Not a requirement; no price is implied.

PERSONAL BRANDS · CLUB COLLECTIONS

Your identity. Built on MAXIMUS.

Your community receives its own visual identity on a confirmed MAXIMUS configuration.

Players · Coaches and academies · Clubs · Corporate clients · Community organisers

Shown: MAXIMUS POWER 98 · 350 g with its personal engraving zone.

01 Base
Choose a confirmed MAXIMUS configuration.

02 Vision
Describe the visual identity you want.

03 Quantity
State how many racquets the collection needs.

04 Confirmation
Receive the technical and commercial confirmation in writing.

Personalisation: name, initials, number; individual graphics; club or corporate design; further elements after a production and image-rights check. Batches of 100–200 racquets are examples for discussion, not a universal minimum. A collection does not by itself transfer intellectual property, a territory, exclusivity or a trademark right.

CLUBS · NATIONAL PACKAGE

A library where every player finds a match.

A proposed reference and fitting collection for each country: two examples of every weight, length and factory grip combination across the three playing series and both trainers — including the uncommon larger grips.

FAMILY	COMBINATIONS	UNITS, TWO OF EACH
GREAT	1,848	3,696
POWER	1,848	3,696
SPIN	1,848	3,696
Sweet Spot Trainer	3,416	6,832
Spot Trainer	3,416	6,832
Per country	**12,376**	**24,752**

HOW A PACKAGE IS COUNTED

Items = confirmed configurations × copies of each + agreed sales stock. The reference library is kept separate from stock for sale. This specification is for planning and discussion: it does not confirm stock, production readiness, a sale or delivery.

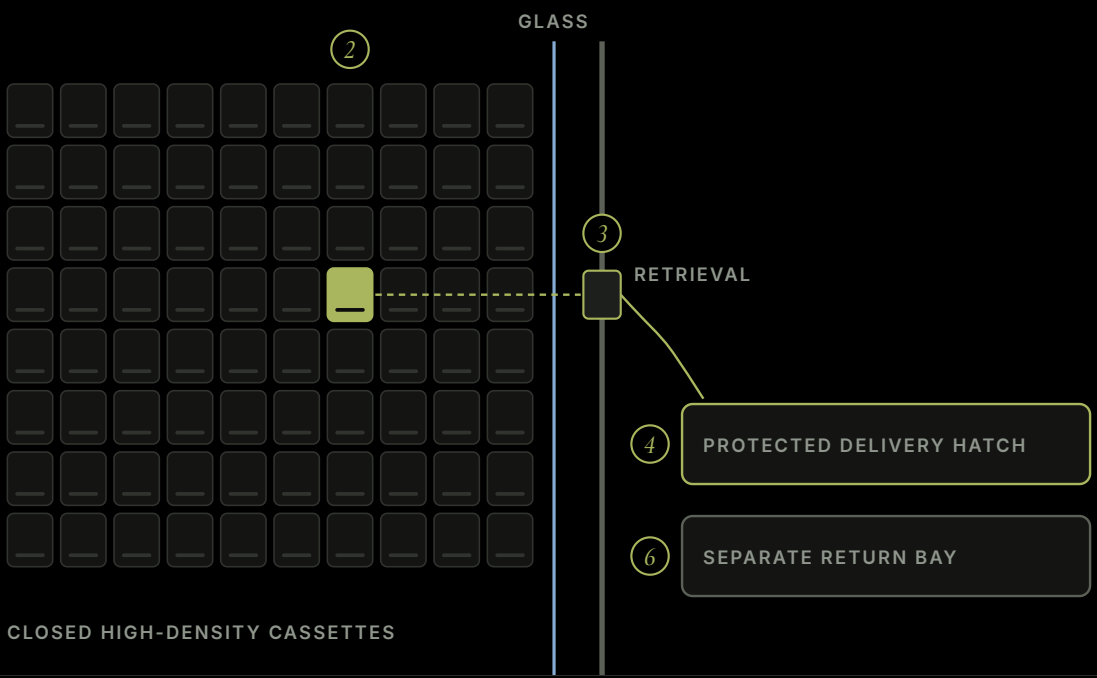

PARTNERSHIP ROUTES

Coaches	maximus.tennis/en/partnerships/coaches
Clubs and academies	maximus.tennis/en/partnerships/clubs-academies
Shops, distribution and country development	maximus.tennis/en/partnerships/distribution
Strategic and infrastructure	maximus.tennis/en/partnerships/strategic
Institutional programmes	maximus.tennis/en/partnerships/institutional

Club libraries, matched sets and demo days follow the same matrix. Commercial terms, quantities and delivery are agreed in writing for each partner.

MAXIMUS PRO SHOP · CONCEPT CLUB

Thousands of configurations. One exact racquet.

Concept diagram: closed cassettes behind glass, retrieval, delivery hatch and return bay. Not an engineered design.

THE SEQUENCE

1. Select the exact configuration
2. The system identifies the cassette
3. The cassette moves behind glass
4. Protected delivery at the hatch
5. The racquet in your hand
6. Return through a separate bay
7. Checked and stored again

THE DESIGN LANGUAGE

Matte black, carbon textures and rounded casework with safe edges; basalt with a restrained warm accent; calm light. Configurations are kept in closed high-density cassettes behind glass, never on open shelves; the mechanism stays separate from visitors, with a manual service mode.

An architectural concept. Engineering feasibility, storage capacity and certification are not yet established. The engineering brief covers product dimensions with and without packaging, cassette capacity, aisles and service zones, retrieval speed, loads, emergency stop, guarding of moving parts and safe interaction with children.

COOPERATION

Cooperation and exchange of value.

Beyond payment

Besides payment in money, individual partnerships may provide for an agreed exchange of goods, services or a useful contribution. The content, valuation and terms of such an exchange are fixed separately, in a written agreement.

How do you value this racquet?

Tell us the configuration, the price you consider fair, the currency, the quantity, your country and the purpose. It is research into perceived value and the start of a conversation — not a purchase at any proposed price and not a published price list. The configurator has an optional budget field for it.

Meetings

The first meeting under consideration is in Dubai; other cities follow expressed interest. Write to us with your city, the city where you would meet, the number of participants, your role and organisation, and your interest: products, a club, a national programme, infrastructure or partnership.

No date, venue, speakers or partners are set. Travel, hotel and partner offers are planned partnership possibilities, not available services.

WRITE TO US

maximus.tennis/en/contact · gps@maximus.tennis

A short written message is enough. No call is needed to begin.

THE ECOSYSTEM

What works today. What is being built.

CURRENT — WORKS TODAY 4

Racquet engineering and manufacturing
Fully carbon racquets engineered to specification, produced with quality records and traceability.

Precision and individual configuration
Four parameters, three precision classes, eight grip sizes and custom engineering.

Training and methodology
Sweet Spot Trainer, Spot Trainer and a structured development journey.

MIPA provenance and internal control
The internal IP, provenance and document-control layer.

AVAILABLE BY AGREEMENT — ON WRITTEN TERMS 7

Player and coach development
Coach-led selection, records, reassessment and education routes.

Personal identity and personal brands
From engraving to a rights-governed personal or professional brand.

Contractual licensing and royalty programmes
Licensed brands, products and rights packages with terms defined per agreement.

Family participation and programme benefits
Informed decisions, continuity, preserved records and programme-defined benefits.

MAXIMUS Sports Network
Players, coaches, clubs, academies, service providers, operators and regional partners.

Clubs, academies, distribution and country development
Team programmes, retail, distribution and territory development through written qualification.

Institutional programmes, education, innovation and social impact
The institutional layer provided by MAXIMUS INVESTMENT BUSINESS CLUB NPIO (DIFC) where a programme establishes that role.

IN DEVELOPMENT — NOT YET OPERATING 2

Owner records, knowledge and rights
A proposed permissioned owner vault for equipment, development and rights records.

Digital infrastructure and Blockchain 5.0 direction
Provenance, traceable records, permissioned evidence and product identity as the stated technology direction.

Statuses as on maximus.tennis/en/ecosystem, 14 October 2026. A purchase creates no royalties, investment returns, sponsorship or membership; each programme has its own written terms.
